SOFTWARE ENGINEER

I am a highly motivated and enthusiastic software engineer with a passion for problem-solving and creating efficient solutions. My journey in technology started while working as a bartender where I developed a strong customer-focused mindset and a keen eye for detail for over a decade.I am now eager to bring my customer-focused approach, drive for excellence, and technical abilities to a company where I can continue to grow and make an impact.

TECHNICAL SKILLS

- Programming Languages: *Javascript, CSS, HTML, Ruby on Rails*
- Frameworks and Technologies: *React, Redux, Tailwind*
- Operating Systems: *Windows, macOS*
- Currently Exploring: *Typescript, Python, MongoDB*

TECHNICAL PROJECTS

Yes Chef - [Github](#)
""Yes Chef!" is a restaurant inventory app developed using React and Ruby on Rails."
- With its intuitive interface, the app makes it easy to add, update, and remove items from the inventory.
- Issued the functionality for users to see when their stock was running low, and resupply when needed.

Wander - [Github](#)
"Wander is a niche travel blog that showcases unique experiences."
- Set up authorization and authentication for users to log in, log out and sign up
- Paired-programming project developed with React.js and Ruby on Rails

GoT or NoT - [Github](#)
"A Game of Thrones meets Grand Theft Auto with a dash of satire dating site."
- Established a unique page through fun ideas and creative CSS
- Provided users the ability to playfully add characters, and delete characters by "swiping right"
